

DEPARTMENT OF MATHEMATICS
INDUSTRIAL VISIT

On 21st February 2025, Maths Department organized an Industrial Visit to LS Mills Pvt.Ltd. located in Theni. We started from the college campus at 6.30 a.m. Totally 28 students from Maths and 3 students from Physics along with 3 faculty. LS Mills Ltd vision born in 1979 in Theni. This mill has a strong foothold in spinning, weaving, and made-ups. It has continually progressed over the years, with its growth driven by the collaboration of crucial components, including people, technology, and innovation.

Process of Making Yarn:

- Cotton Harvesting
- Ginning and cleaning
- Carding and Yarn formation
- Spinning
- Winding and finishing
- Weaving

The process of manufacturing cotton yarn blends tradition with modern technology, having developed over the years. Understanding how cotton yarn is produced enhances appreciation for the value and beauty of this natural fiber, treasured for generations. From cotton fields to spinning factories, the production of cotton yarn is an interplay of art and science, honed over centuries to create one of the most cherished fibers in fashion and textiles. The students expressed great joy and gained a wealth of knowledge from the Industrial Visit. Finally, the Manager gifted a sapling to our college.
