REPORT ON CAREER KICKSTART WITH PYTHON COURSE

The Department of BCA successfully conducted a one-month (23.02.2026 to 03.04.2026) python programming course titled “Career KickStart with Python” scheduled from 2:30 PM to 3:30 PM at the BCA Lab for the students of B.Com (CA) and BBA with the objective of enhancing their technical and programming skills. Nearly 30 students were participated. The course was designed to provide a strong foundation in Python, covering essential topics such as basic syntax, data types, control structures, functions, and an introduction to modules. Throughout the program, students actively participated in hands-on sessions and practical exercises, which helped them understand real-world applications of Python. The training also emphasized problem-solving techniques and logical thinking, enabling students to write simple programs independently. By the end of the course, the participants demonstrated noticeable improvement in their coding abilities and gained confidence in using Python for academic and practical purposes. Overall, the initiative proved to be highly beneficial, bridging the gap between theoretical knowledge and practical implementation while preparing students for future technological challenges. Finally E-certificates will be awarded to all participants upon completion.
